misunderstandings these in turn quite often lead to lack of understanding conflict even political disaster like in 2005 with the danish caricature scandal involving the newspaper jyllands posten when a fundamentalist muslim cleric from egypt living in denmark felt offended and ridiculed in his religious beliefs by caricatures featuring mohammed the islamic world thereby rallied to the case and did not only react with outrage and boycott but with violent attacks in the course of which 140 people lost their lives and several hundred were injured milder reactions like rejection and hidden resentment are however the more common outcomes due to intercultural misunderstandings how otherwise would there be stereotypes mostly carrying negative connotations like the obedient chinese the superficial american or the super punctual german lacking humor the dutch anthropologist and cultural scientist geert hofstede suggests that the reason for such misunderstandings is a culturally divergent often concealed moral concept with a direct impact on human actions and thinking hofstede has devoted himself to this issue and has developed a model based on a long time study elucidating peculiarities of and differences between national cultures in comparison thereby hofstede classified national cultures according to five pillars also called dimensions which dependent on the nation vary markedly and in his study are set in relation to each other the subject and the goal of this assignment is to present the main features of hofstede s model of the five dimensions of national cultures following the practical applicability of this model is briefly discussed
